

## product range

### F48S

Fully Automatic Mobile block making machine capable of producing solid and hollow building blocks from 190mm to 450mm high.

Maximum mould area, 1268 x 900mm.

Single tier moulds interchangeable with F24 machines.

### F44S

Fully Automatic Mobile block making machine capable of producing solid and hollow building blocks from 190mm to 450mm.

Maximum mould area, 1160 x 900mm.

### F24C

Semi Automatic Mobile block making machine capable of producing solid, hollow and thermal Polystyrene insert building blocks.

Product height range, 190mm to 275mm.

Maximum mould area, 1268 x 900mm.

Moulds interchangeable with F48S machines.

### F24

Semi Automatic Mobile block making machine capable of producing solid and hollow building blocks.

Product height range, 190mm to 275mm.

Maximum mould area, 1268 x 900mm.

Moulds interchangeable with F48S machines.

## F12

Semi Automatic Mobile block making machine capable of producing solid and hollow building blocks.

Product height range, 190mm to 250mm.

Maximum mould area, 1268 x 490mm.

## BSM-412

Fully automatic Block strapping machine.

The Finlay Strapper is a purpose designed machine which incorporates a 4-way clamping assembly working in conjunction with an automatic strapping head. The combined action of both clamp and the strapping head ensures the pack is consolidated and strapped in preparation for storage and transport.

## FBS-744

The SRS Finlay FBS-744 Block sprayer is a machine designed specifically to work in the warmest climates to apply water to assist curing of concrete blocks, this added moisture helps prevent cracking in the blocks and improves the compressive strengths by stabilising the curing process.

## Mould boxes

SRS Finlay manufacture a range concrete block moulds to produce hollow, solid and insulation blocks. Our moulds are manufactured to suit all leading mobile block machines. All moulds are manufactured from Hardox Steel for maximum strength and durability.

## Attachments

SRS Finlay now offer an extensive range of attachments to facilitate all materials handling needs. From concrete block clamps and feed hoppers to fork mounted sweepers and rubbish skips.
